

INFORMATION BROCHURE

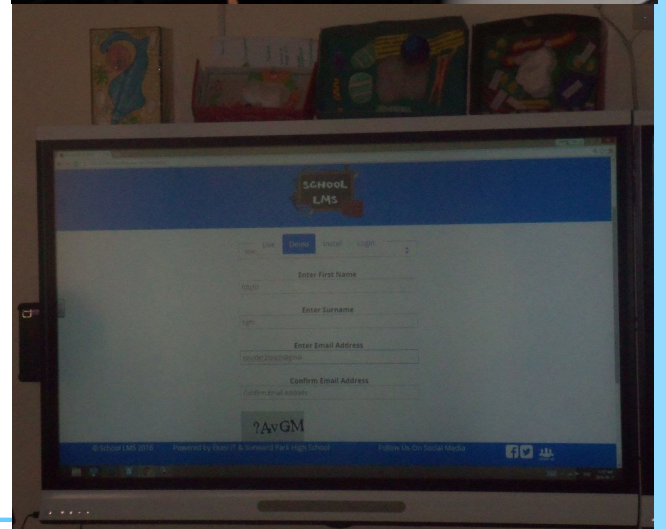

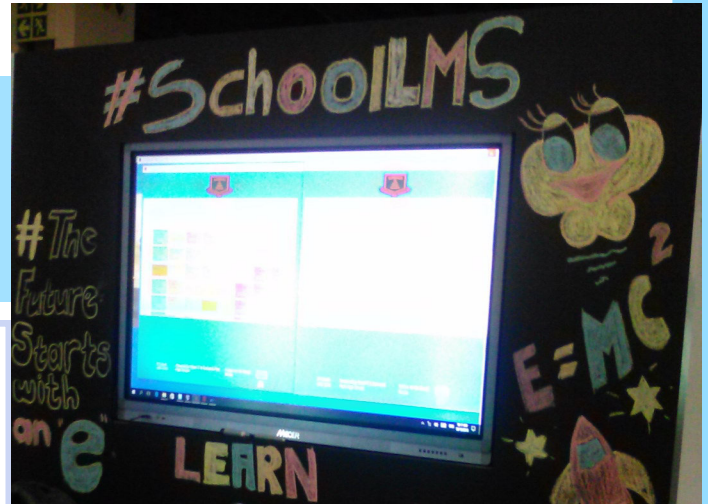

Version 1

WHAT IS SCHOOL LMS?

SchoolLMS is a learner and learning management system that integrates all e-learning tools and content to present it to all users through an intelligent and interactive timetable.

SchoolLMS is easy to use and can be accessed by all stakeholders within the learning fraternity, namely:

- ◆ Teachers
- ◆ Learners
- ◆ Parents
- ◆ Management
- ◆ Admin
- ◆ Support
- ◆ Trainers
- ◆ Value add service providers.

FEATURES

TEACHER APP

This App provides educators with a platform in which they can:

- * Plan lessons and create content.
- * Teach
- * Collaborate with other educators
- * Manage learners and monitor learner performance.

LEARNER APP

This application enables learners to:

- * Access content that has been prepared by the educator
- * Create a personal study plan
- * Complete tasks that have been allocated by the educator, (homework).
- * Interact and collaborate with other learners (virtual study groups).
- * Manage tasks and activities.

PARENTS APP

This App enables parents to:

- * Access school notifications
- * Monitor learner performance and provide or obtain feedback regarding learner performance and conduct.
- * Receive homework notifications
- * Receive meeting notifications.

MANAGEMENT APP

This App is intended for use by the School Management Team, SGB, District Directors, and the MEC.

The management team is provided with time statistics and reports.

Management is able to:

- * Track time and attendance
- * Receive or forward meeting requests
- * Monitor learner or school performance.

FEATURES

CONTINUED...

ADMINISTRATOR APP

The App is aimed at providing a platform for the completion of the school's administrative tasks.

Tasks that can be completed through this App include:

- * Student registration
- * User management
- * Content management
- * Time and attendance management

TRAINER APP

The training platform provides an environment in which users can access training on the system at any time.

This feature includes:

- * How to video and lessons
- * Teacher training material
- * SMT training material
- * SGB training material
- * Support training material.

SUPPORT APP

A platform where all users can access local or virtual system support.

VALUE ADDED SERVICES

This App provides a platform in which external service providers can be plugged into the system. The Value added services that are currently plugged into the system are:

- * Tracking
- * Timetable
- * School Management System (SASAMS)
- * Mobile Device Manager (MDM)
- * Virtual Banking Platform

TIME TABLE

The Timetable is a tool used daily by both learners and educators.

SchoolLMS uses this tool to facilitate quick and simple access

to e-learning content for both users.

5 . Learner accesses Published lesson by clicking on the slot on their

E-LEARNING TRACKER

The e-learning tracker is a feature that is highly beneficial to managers at school, district, provincial, and national levels.

It enables them to keep track of learning within the school by providing them with real-time statistics on class attendance and learner performance.

If applied effectively, the tool can assist with the identification of challenges within the school and development of appropriate remedial actions where necessary.

Parents can also use the tool to monitor learner performance and behaviour.

/as/timetable/

E-Learning Tracker

	P2	P3	Break	P4
TATS	0% STATS	0% STATS		0% STATS
TATS	0% STATS	0% STATS		0% STATS
TATS				
powered by Ek				edia

Managers and parents can monitor learner performance and behavior and apply remedial action where necessary.

E-DEVICE TRACKER

The App enables parents and educators to track a learners geographical location, making it easier to determine whether the learner is in school/class.

The Device Tracker App was developed in response to the prevalence of theft/ loss of devices in schools.

Through the App, lost/ stolen devices can be recovered.

The tracker is not geographically limited and devices can be recovered regardless of distance.

Parents and school managers can also determine the location of a learner in possession of a device.

This serves as a deterrent for unacceptable behaviour such as bunking school or class, ensuring learner safety especially during school hours.

PARENT APP

Research conducted over the years proves that parental involvement in children's learning impacts positively on learner performance. It has also been proven that parents who are intensively involved in their children's learning have children who perform better at school, furthermore, the positive impact is not limited to academic performance but also transcends to behaviour and attitude (Cotton and Wikelund).

The parent APP was designed to facilitate and simplify parental involvement in learner education. Allowing parents to have a real time overview of what is happening during the child's school day.

By clicking on the learner report tab, parents are able to access and view

- * Learner reports
- * Exam/ test results

By clicking on the School calendar Tab, parents are able to access information relating to:

- * Test/ exam schedules
- * Sporting events,
- * And other school events/ activities

© School LMS 2016 Powered by Ekasi IT & Sunward Park High School Follow Us On Social Media

Parents can view learner Time table and access information such as:

- * Class attendance
- * Class/ subject teacher information

Parents can also view detailed statistics including:

- * Whether merits/demerits were awarded to the learner during class.
- * Whether the learner accessed content during class
- * Whether the learner created study notes during class.

← Class List

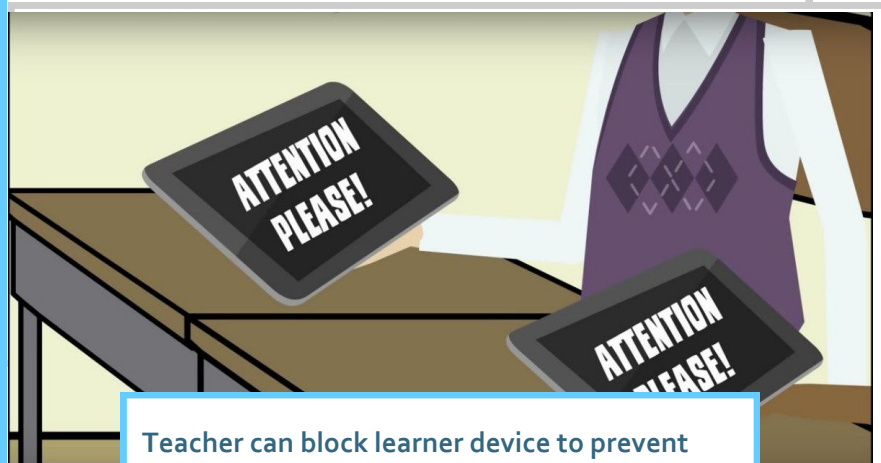

Through the Timetable, the educator is able to access the class list.

The automated process reduces the burden of administrative tasks such as:

- ♦ Checking time and attendance
- ♦ Awarding merits and demerits
- ♦ Controlling learner devices (to prevent learners from accessing irrelevant/ inappropriate content during school hours).

Student Name	Image	Present	Merit	Demerit	Action
2. CINDI, NTKOZO		<input checked="" type="checkbox"/>	0 View Merit(s) Add Merit(s)	0 View Demerit(s) Add Demerit(s)	1
085 DHLOMO, NOMONDE		<input checked="" type="checkbox"/>	0 View Merit(s) Add	0 View Demerit(s) Add	1

Teacher is able to award merits and demerits.

Teacher can block learner device to prevent learners from accessing inappropriate content.

SCHOOLMS QUICK FACTS

Easy to Integrate With Other Systems.

The system can be used in conjunction with other LMS or School management systems.

Continuous System Support

Continuous system support is available, and although the system is simple to use, training can also be accessed.

Produced in Africa, for the African User.

The system was developed for the African e-learning context, with the African user in mind.

The system can also be used offline as not all users have access to internet infrastructure.

Customisable to User Requirements

Need a system to facilitate your corporate e-learning?

No problem!! SchoolMS is fully customisable to meet your unique requirements!!!

User Incentives

Users of the system are able to derive tangible financial benefits from using the system!!!!

We coined this phenomena, Use to Earn and Earn to Use.
